

# The Global Network Intelligence Advisory

Empowering sovereign cyber defenses and the world's most advanced enterprises with unmatched network visibility, embedded expertise, and strategic partnership.

## Challenge

The most sophisticated adversaries operate at a scale that overwhelms traditional teams and tools - even national cyber defenses and well-resourced enterprises face unique blind spots in defending their networks. Internal telemetry alone is not enough.

## Solution

The **Global Network Intelligence Advisory** delivers a premium, high-touch engagement model for sovereigns and advanced enterprises to defend their networks. Built on Recorded Future's distributed network intelligence sensor framework — with hundreds of global points of presence — the Advisory combines unparalleled data visibility with forward-deployed analysts, embedded engineers, and bespoke strategic support.

### Access Model

- Nation States & Global Enterprise\*\*
- Embedded forward-deployed threat researchers and/or engineers for onsite support
- Tailored strategic guidance and fusion analysis for complex environments
- Access to unique, high-fidelity network intelligence observations and analytic tooling
- All engagements bound by strict ethical, legal, and compliance safeguards

\*\*Invitation-Only - Investment Required

## Approved Use Cases

- Nation-state cyber defense and intelligence fusion centers
- Strategic and tactical threat research and adversary tracking at scale
- Incident response and attribution in highly sensitive environments
- Tailored support for critical infrastructure operators

## How it Works

- **Engagement:** Exclusive invitation-only program for vetted sovereign and enterprise partners
- **Integration:** Forward-deployed analysts/engineers integrate with customer teams
- **Data:** Advisory access to Recorded Future's network intelligence visibility and analytic environment
- **Fusion:** Bespoke analysis and strategic reporting delivered through joint workflows
